SHAH & ANCHOR ™

INTRODUCTION

- As they say *'first impression is the last impression',* the same thing implies to resume building. As during interview our resume is the first impression to the interviewer. A resume should not be boring for the interviewer. building a resume is hectic work for students and many of them fail in this job which affects the overall impression in front of the interviewer. Some of the common errors are typo or grammatical errors, long resume, **not Enough Information** etc. Also, many companies judge the student by their ability to build their resume. To make an attractive resume, a student must think out of the box. Some resume problems may seem insurmountable at first, or may seem impossible to overcome without the help of a professional resume editor. But if you take a deep breath and a closer look, some of these problems may be easy to sort out with a few simple word changes or formatting revisions. In our website we are dealing with all these problems and helping students of different profession to built a strong resume that will increase their chances of getting their dream jobs.

LITERATURE REVIEW

According to some earlier research first impressions have a substantial impact on the interpretation of subsequent information. In a business context, the first impression of a job applicant has traditionally been made through the resume.
 the key points of writing a strong resume are as follows:

- **Personal Information**:**Hornsby & Smith, (1995)**A well-established body of research has suggested that the applicant's name, address, and phone number should be included in the resume. It did not focused on the stylistic resume issue.**Burns, Christiansen, Morris, Periard, and Coaster (2014)** has supported the inclusion of a school email address over a personal email address. this is especially applicable for students and recent graduates.
- **Education**: **Burns et al., (2014)**Some early and more recent research strongly agree on the fact that resume should include formal education qualification including information regarding the degree or designation as well as the major, minor, and, if applicable, the expected date of graduation.**Ray, Stallard, & Hunt, (1994)** a convincing body has supported the inclusion of GPA data including GPA within majors and possibly also overall GPA.
- **Work Experience**:**Feild & Holley, (1976)** According to it is necessary to add the work experience section in the resume which should contain information regarding previous employers, dates in which they worked for each employer, whether the job was full time or part time, also the job title at each previous employer.
- **Scholarships, Awards, and Honors**:**Burns et al., (2014)** research support inclusion of list of Scholarships, Awards, and Honors.
- **Hobbies, Interests, and Extracurricular Activities**: **Mansfield, (1976)** an ongoing debate in the literature pertains to the inclusion of categories, such as hobbies and interests. In early resume research, less than 50% of the company officials surveyed from the Fortune 500 Largest Industrial Corporations preferred information pertaining to non-job-related factors, such as hobbies and recreational interests to be included in the resume.

PROBLEM DEFINITIONS AND OBJECTIVES

Problem definition:

- Many people face problem in expressing their resume in a precise manner.

- Applicants express too much or too less or they hide the cold time.

Objectives:

•Develop a precise resume which contain skills, work experience, achievements, education qualification and personal information of the candidate.

Scope:

•The Project has a wide scope, as it is not intended to a particular organization.
•This Project will benefit Students, Interns as well as experienced professionals to build their CVs.
•The website may also feature a Local Language support such as Hindi, which will help to maximize its reach

Feasibility study:

•It will be a Free to use website so anyone can access it. The webite will feature a good UI with usefull features with easy to navigate layout. To be able to build a Cv is the main purpose of this project.

Client-Side : Html, Css, Js, Bootstrap

Server-Side : Php, MySql

SUMMARY

- In order to make this job of students and working professionals easy, we have built a resume-building website in which they can build a strong resume, which will increase their chances of securing a job. In this, we will not only provide different stylized templates but also advice users the correct steps to be followed while building a resume. The user will get their resume in hand just by filling a simple form, where important details need to be filled. The resume will be downloadable (PDF) or be Printed directly. This will save a lot of time and help them to make a impressive resume in short time.
